

INSTALLATION INFO for DNA filter P-AP10S09-0R

For: Aprilia RSV4 2009'-2010'

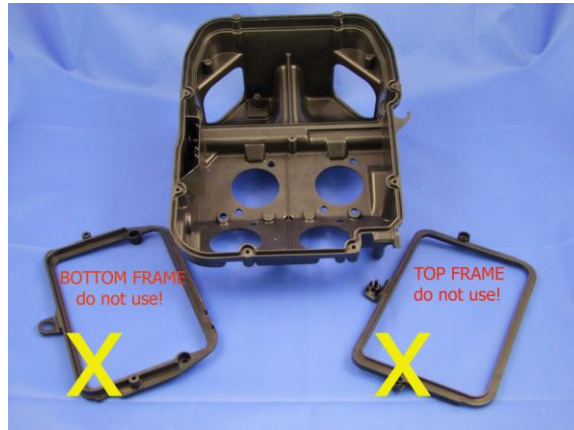

The DNA High Performance filter P-AP10S09-01 is designed to replace the Aprilia RSV4 stock replacement 2 layer filter and the 2 plastic frames.
The DNA Filter can be used for road and race use.

To install or later remove your DNA filter for cleaning it, please follow the detailed info listed below:
(We recommend that the installation should be carried out by a trained mechanic)

1. Open the air box and remove the upper filter supporting frame, then remove the stock filter and finally remove the lower filter supporting frame from the air box, following the instructions found in the Aprilia service manual.

Pay attention NOT TO DROP THE STOCK BOLTS IN THE AIR BOX OR ENGINE!.

You will no longer use the stock top and bottom frames and bolts with the DNA filter. See photo below:

2. Install the DNA filter and carefully tighten the 3 bolts, which are "pre-installed" on the DNA filter, until the filter sits in place.

Do NOT over tighten! See photo below:

3. Attention: when closing the top of the air box do not over tighten!

Service instructions:

ATTENTION: Follow the DNA Service Kit Instructions carefully to service (not included with the filters).
