

INSTALLATION INFO for DNA Air Filter :
P-KY5SC12-01 for the Kymco XCITING 500 2005'-2012'

The DNA P-KY5SC12-01 air filter is designed to replace the stock Kymco paper air filter P-KY5SC12-01, Efficiently protect the engine and increase the airflow, Power, Torque and Throttle response.

The following procedure is necessary for installing the P-KY5SC12-01.

1. Open the air box and remove the stock air filter, following the instructions found in the Kymco service manual.

2. Apply DNA air filter sealing grease (supplied) to the Points A & B of the air box (see photo):

It is recommended to use latex gloves to apply the grease.

3. **Attention!** It is very important to apply the sealing grease as shown, the air box body and the cover, at points A & B DO NOT SEAL PERFECTLY. The sealing grease will stop the dirt passing through the sides. If the sealing grease is applied correctly it should look as the photo below:

4. The DNA filter installed, before bolting the top cover:

5. Install the top air box cover correctly and bolt the 6 bolts.
Do not over tighten!

To service the filter use the genuine DNA Service Kit **DSK-2001** available from your local DNA dealer.
Follow the Service Kit Instructions to service.
Re-install following the installation procedure again.
