

The DNA High Performance filter R-HU5SM09-0R is designed to replace the Moto Guzzi stock replacement paper filter element & frame. In order to install or to remove your DNA filter for cleaning it, please follow the detailed info listed below: (we recommend that the installation should be carried out by a trained mechanic)

1. Remove the stock filter from the bike following the instructions found in the Moto Guzzi service manual.
Pay attention to remove carefully the old filter, so no debris falls in the clean side of the air box.
After removing the old filter clean carefully the air box removing all the debris.

2. The stock plastic frame, that is used to support the stock paper filter, will NOT be used any more.

4. Apply DNA air filter sealing grease (included) on the sealing edges of the DNA filter (always use latex surgery gloves to apply the grease).

Read the information on the DNA filter and pay attention not to damage the filter when passing it between the frame and the air box during installation!

Close the air box and you are ready to go.
