

**INSTALLATION INFO for DNA filter P-S10E14-01**  
For: V STROM DL 1000 14'

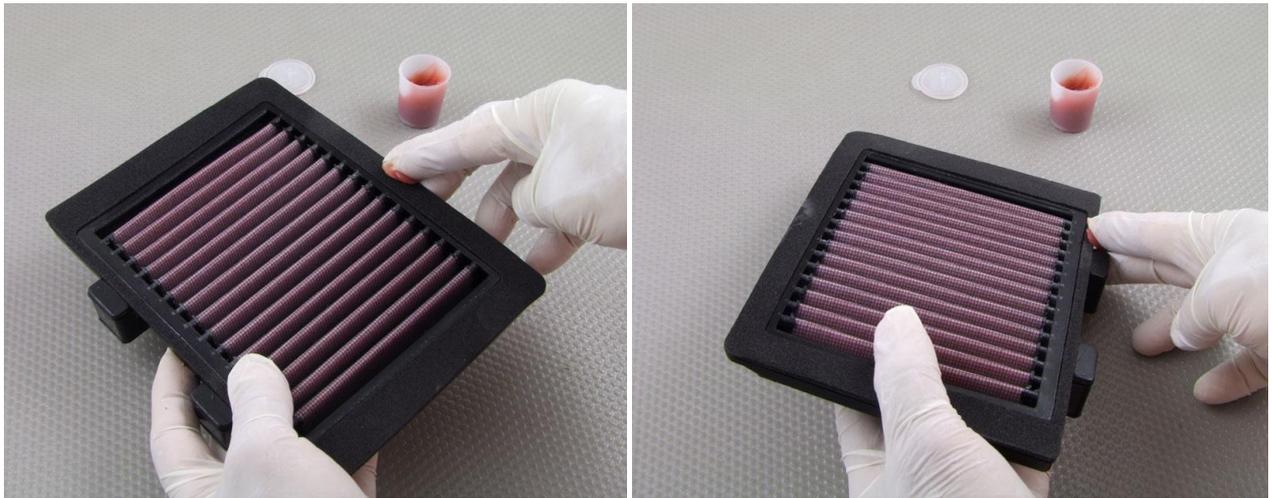

The DNA High Performance filter P-S10E14-01 is designed to replace the SUZUKI stock replacement PAPER filter.  
The DNA can be used for road, Off road and race use.  
To install or later remove your DNA filter for cleaning it, please follow the detailed info listed below:  
(we recommend that the installation should be carried out by a trained mechanic)

**1.** Remove the stock filter from the bike following the instructions found in the SUZUKI service manual.

Pay attention to remove carefully the old filter, so no debris falls in the clean side of the air box.

**2. Before** installing the DNA filter, DNA air filter sealing grease (included) must be applied on the EVA gasket of the filter, to help the filter slide in place and seal perfectly.

See photos bellow:

**3.** Install the DNA filter in the air box and close the air box top (do not over tighten!).

**Service instructions:**

ATTENTION: Follow the DNA Service Kit Instructions carefully to service (not included with the filters).
