

**INSTALLATION INFO for
DNA stage 2 air box cover :**
TC-Y6E08-S2 Yamaha XT 660 Z 08'-09'

DNA STAGE 2 TC-Y6E08-S2 Yamaha XT 660 Z Airbox cover is designed to replace the stock air box COVER and in cooperation with a DNA High Performance Filter R-Y6E08-01(not included) to increase the airflow, Power, Torque and Throttle response.

The following procedure is necessary if you use the DNA airbox COVER.

1. Open the airbox by removing the stock cover/rubber intake.
2. Remove the std. paper filter.
3. Install a DNA filter **R-Y6E08-01**(must be purchased separately) **in the airbox** OPEN END faces up and the stage 2 airbox COVER **TC-Y6E08-S2** using the stock 4 bolts, **to close the airbox**. Do not over tighten!

4. WARNING..!

Fuel injection **recalibration** is absolutely necessary! Please use a Dynojet Powercommander or similar product to correct your fueling or else the bike will run lean and possible damage will occur.

A special Powercommander map is available from DNA, please visit:
www.dnafilts.com or contact info@dnafilts.com for tech support.

Note: Although the Stage 2 cover will work with the stock filter, for maximum air flow it is recommended to use the stage 2 DNA COVER in cooperation with a DNA standard filter designed to replace the stock filter.

For race or closed circuit use only, not legal for road use.
